

# Shovit Nepal

nepalshovit@gmail.com | +977 9842087460 | [github.com/shovitnepal](https://github.com/shovitnepal) | [linkedin.com/in/shovit-nepal](https://linkedin.com/in/shovit-nepal) | [shovitnepal.com.np](https://shovitnepal.com.np)

## Skills

---

**Databases:** MariaDB/MySQL, HBase, Cassandra, Redis, PostgreSQL

**Big Data & Streaming:** Apache Hadoop, Apache Kafka

**Infrastructure & Tools:** Docker, VMware, Git, GitHub, Linux (Rocky Linux)

**Soft Skills:** Problem-Solving, Team Collaboration, Fast Learner, Adaptive

## Projects

---

### Distributed System on HBase

- Built a fault-tolerant distributed storage system using HBase, configuring region servers, ZooKeeper quorum, and HDFS for high-throughput, low-latency operations.
- Benchmarked read/write performance under varying workloads and tuned compaction strategies for storage efficiency.
- Technologies Used: HBase, Hadoop HDFS, ZooKeeper, Java, Linux.

### Distributed System on Cassandra

- Deployed a multi-node Cassandra cluster with tunable consistency, simulating node failure/recovery to validate replication and horizontal scalability.
- Modeled wide-column schemas for time-series and write-heavy workloads, optimizing query performance across distributed nodes.
- Technologies Used: Apache Cassandra, CQL, Docker, Python, Linux.

### Independent Research: Proposed Dataflow Model of NPCI

- Hypothesized and modeled a probable data flow for NPCI's payment infrastructure (UPI, IMPS, RuPay) based on public documentation and system behavior analysis — internal architecture is undisclosed; this is an informed analytical interpretation for academic purposes.

### Independent Research: Proposed Dataflow Architecture of Paytm

- Analyzed and proposed a likely data pipeline for Paytm's platform — modeling probable usage of Kafka, Redis, and stream processing for real-time payments and fraud detection — based on public engineering resources; findings are an analytical inference for research purposes.

## Education

---

### Bachelor of Computer Applications (BCA)

Tribhuvan University (TU) — Patan Multiple Campus, Patandhoka, Lalitpur

*Final Year*

## Academic Projects

---

### Doctor Appointment Booking System

- Web-based platform for booking and managing doctor appointments with user auth, doctor profiles, and a relational DB schema. | PHP, MySQL, HTML, CSS, JavaScript.

### Nepal Tour and Travel Adventure

- Travel web app showcasing Nepal's trekking routes and packages with admin panel, booking form, and database persistence. | HTML, CSS, JavaScript, PHP, MySQL.

### Training Status Management System

- Desktop system to track employee training enrollment, completion, and certifications with role-based access and reporting. | Java, MySQL, Swing.

## Work Experience

---

### Database Administrator Intern | eSewa Ltd.

*January 2026 – April 2026*

- Deployed and maintained high-availability database clusters; optimized large-scale data operations for improved query performance and reliability.
- Gained hands-on experience with real-time stream processing and modern data pipeline architecture using Kafka and Apache Flink.

### L1 & L2 Support Engineer | Worldlink Communications Ltd.

*2019 – 2022*

- Provided first and second-level technical support, diagnosing network/infrastructure issues and escalating complex cases with minimal service disruption.

- Maintained high customer satisfaction through prompt resolution and clear communication across diverse client environments.
