TO WHOM IT MAY CONCERN

I am pleased to recommend Mr. Shovit Nepal following his three-month Database Administrator internship at eSewa Ltd. During his time with us, Shovit stood out for his focus, technical curiosity, and proactive work ethic.

While many interns focus on routine tasks, Shovit took the initiative to conduct deep-dive research into advanced distributed databases, including Cassandra and HBase. He excelled at:

In-depth Research: Analyzing multiple database systems to evaluate their performance and scalability.

Knowledge Sharing: Delivering a high-quality technical presentation and demo of his findings to our team.

Technical Documentation: Producing clear, detailed guides on his research and prototypes.

Shovit is a dedicated professional who is quick to learn and works well both independently and in a team. His ability to translate complex research into practical demonstrations was a significant asset to our department.

I recommend Shovit for his commitment and technical potential. I am confident he will be a valuable addition to any organization he joins and wish him the very best in his career.

Best regards,

eSewa
